PCOPTIMIZER

PARTNER PROGRAM · COD COMMUNITY SITES

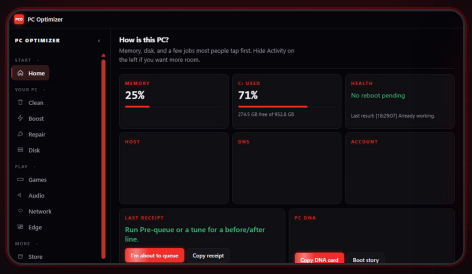

Partner with PCOptimizer.

PCOptimizer (PCO) is a Windows 10 & 11 app for PC gamers, made by one developer. It puts the game tweaks people dig through settings and forum guides for into one app, and shows every change before it's made. A natural fit for sites whose readers play COD on PC.

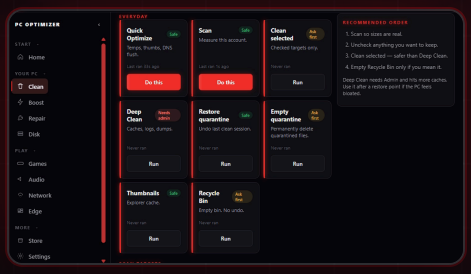

INSIDE THE APP

Before you queue: a pre-queue checklist with Rollback and Undo.

Home: PC health and one-tap jobs.

Clean: scan first, restore from quarantine.

WHAT PCO DOES

- **Game auto-tune.** Finds installed games and sets power plan, Game Mode and GPU scheduling in one click.
- **Before you queue.** A quick checklist to run before a match.
- **Undo Last Tune.** Roll back the latest change in one click.
- **PCO Audio Engine.** Footsteps, Surround and Mic tuning with an A/B switch. Results vary by headset.
- **Clean, Repair, Network, Disk.** Scan first, restore point before deep repairs.
- **No surprises.** Every action is labelled Safe, Ask first or Needs admin. No overclocking, no game-file changes, nothing injected into games.
